

TATUM

October 29, 1958

Dear Ed:

Congratulations, Ed, and then once again with my personal appreciations.

As ever,

Joshua Lederberg

P.S. This Affaire Nobel could hardly have come at a more awkward time, as we are leaving for Stanford later on in January, but no mind. It would be great fun if we could go over together-- have you thought about that at all? We thought of taking a PAA jet NY-Paris on Saturday or Sunday, December 6 or 7, and then connect straight on for Stockholm, doing any other visiting, if any, on return. There's also a connection to London that leaves ~~XXXXXX~~ mornings, but arrives in the evening too late to go on to Stockholm, so we'll probably ask for the Paris reservations in the first instance, while waiting for word from you (and, by the way, Stockholm!).

The way things are moving for Genetics at Stanford Medical School is very gratifying and we are really looking forward to the move.

In any case, I hope we see you in New York.
